

8 - 10 November 2022
Nuremberg, Germany

Company mission of
Ukrainian companies to
SPS Exhibition 2022

THE UKRAINIAN CHAMBER
OF COMMERCE AND INDUSTRY

Introduction

Enterprise Europe Network is a global network covering 70 countries all over the world. It has over 600 business associations, about 20,000 business offers and innovation technology. Each year, EEN organizes about 700 business events and b2b meetings, where entrepreneurs are looking for business partners worldwide.

EEN offers a wide range of services:

- Search for business partners and buyers of their products;
- Place and track commercial offers;
- Promote their innovative technologies to the EU markets;
- Search and attract modern innovative technologies from abroad;
- Search for investors and partners in the EU to create joint enterprises.

This catalogue presents Ukrainian companies with their edge-breaking ideas and new vision of the world which combines forward-thinking, creativity and brings the future closer.

These companies were selected by EEN-Ukraine Consortium to present their innovative ideas during the SPS Exhibition 2022 in Nuremberg, Germany.

Ukraine is a Brave, Smart and Innovative country.

Stand with Ukraine!

RERUM

"RERUM"

"Bynesoft" presents its flagship product "Rerum", a visual environment to train machine learning models and integrate them into production-ready pipelines.

We offer a wide range of "modules" capable of processing text, images, and numeric measurements.

We provide an opportunity for every business to create a fully automated workflow powered by AI without any IT expertise, with no-code deployment and maintenance.

"TEHNOTABLE"

Sitting for 3 or more hours a day is responsible for 3.8% of all-cause mortality; even a modest 10% reduction in sitting time can have an immediate impact on reducing mortality.

TEHNOTABLE - is an expert in the world of ergonomics, we produce the Tables as a turned-key solution. We've solved the problems of sedentary life and converted work into efficient and filled with positive emotions activity. After 2 weeks of using a lifting desk, your work efficiency increases by 30%, lower back pain reduces by 32%, the cardiovascular system starts functioning better while the risk of excessive weight gain, stress feelings and blood sugar level decreases.

Our production facility was established in Ukraine, 2019.

"YourAirTest"

The YourAirTest air quality monitoring ecosystem is a wide range of Software and Hardware products worked on by a team of scientists, ecologists, developers, graduate students and students.

We model pollution emissions from businesses, fires and cars, as well as emissions from nuclear power plant accidents, to further visualize them on a map and calculate the level of negative impact on the environment, so that society can see, realize and rethink the importance of clean air and change the situation around them.

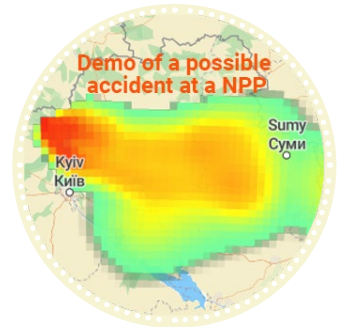

We have many years of experience in modeling pollution, based on Weather Research Forecasting and dispersion model, with an integrated Lagrangian modeling system that simulates the dispersion of atmospheric pollutants.

LLC "INFOCOM Ltd"

INFOCOM Ltd is engineering company, more than 25 years applies innovative technologies and solutions to automate production processes, optimize operations and improve safety.

We specialize in energy distribution, development & implementation of software products that provide automation and information.

Our expert competencies are:

- software development for process automation and process control; IT production management software, including MES, ERP level, APS, LIMS;
- increased hazard work for electrical installations with voltage up to 330 kV and process equipment;
- energy audits for safety purposes (art flash studies, fault tolerance of electric equipment);
- solutions applying digital identification, machine vision, self-learning neural networks;
- unmanned robotic platforms for everyday assistance (Robot-assistant)
- energy storage solutions and integrated solutions for producing green energy (solar parks);
- EV charging stations and charging infrastructure SW.

InfusionLight

InfusionLight is a device for determining the speed of infusion therapy and remote monitoring of this process.

InfusionLight lets you monitor the injecting process of many patients at the same time.

After you adjust the desired drip rate, just apply the device on and press the button. That's all. An infusion process has already been created in the mobile application and can be edited. When the volume of the medication comes to an end, the nurse will receive notification in the mobile app, if the nurse enters the volume of liquid to be injected into the patient.

Also, in the mobile application, the nurse can review all the created infusions of the department. When the infusion process interrupts, the nurse will receive a notification that something went wrong in a certain ward.

“IT-Enterprise”

IT-Enterprise helps large and medium-sized enterprises to adjust processes and improve their management system.

Our **mission** is to help companies implement digital transformation, gain leadership, meet challenges and introduce change.

Our **vision** is to digitalize the world and make a difference for each employee.

Our **tech vision** is to ensure that AI does everything without human intervention: from a sensor signal to decision-making.

Create and implement digital solutions that facilitate the transition to a circular economy.

Transform businesses digitally: optimize and digitalize business processes, help companies become market leaders.

Use state-of-the-art architecture and a Low-Code development platform.

Create IT and business solutions following the principles of Industry 4.0.

"IT-Enterprise"

MAITEK company is a Ukrainian manufacturer of high-tech electronics, developer of software and intellectual systems for housing and commercial objects.

We develop equipment, devices and software for energy saving and managing business processes.

What we offer:

Innovations/Technologies / Research / Products / Services

We combine software for business processes and an energy saving and device management system. System management is tied to a person's location, so it can maximize energy saving.

We manufacture a line of controllers that do not require additional programming.

What we are looking for - Cooperation interest:

- Discover about the latest technologies, sensors, cooperation with manufacturers of similar products.
- Find new dillers, customers, expand the market.

WheelKeep

WheelKeep - is an invisible bicycle security system.

- Can be installed in the steering column
- Completely invisible from the outside
- Notifies the owner about any movements of the bike
- Displays geolocation with an accuracy of 2 meters
- Charges right in the bike
- Works up to two weeks on a single battery charge
- Does not violate the integrity of the bike structure

The device has support for a mobile application that expands its capabilities

- Turning the alarm on and off with one tap
- Notification of any bike movements
- Displaying bike geolocation on the map

Charity Foundation “EEN-Ukraine”

This catalogue was created in cooperation with the EEN-Ukraine foundation

Over the last six years, the Enterprise Europe Network (EEN) consortium in Ukraine – EEN-Ukraine – has been working hard to help small and medium-sized enterprises (SMEs) innovate and grow in the EU's Single Market and beyond. Working in close partnership with other Network members, it has delivered major results for its client SMEs, helping them innovate, access finance and the EU Single Market, and find international partners.

With the renewal of the Enterprise Europe Network, EEN-Ukraine was eager to continue providing these services and delivering strong results. The consortium had successfully applied to be part of the new Network, as soon as Ukraine was able to join the EU Single Market Programme as an associated member.

The unprovoked and unjustified Russian military aggression against Ukraine have put these valuable services and the survival of Ukraine's SMEs in jeopardy. Staff members of EEN-Ukraine have been forced to leave their homes for safer places in the country.

Despite all this and the daily difficulties they face, they remain committed to supporting Ukrainian SMEs and entrepreneurs, and to helping them forge partnerships with other SMEs in the European Union and beyond.

To enable EEN-Ukraine to continue to function until a permanent financial solution can be put in place, a new charitable foundation has been established.

You can become the part of the support programs

Now in this difficult time for our country and society we try to support not only business, but also a humanitarian need. Our Foundation tries to focus on social need for people who are the most vulnerable during the war – women and children. The war in Ukraine is having a devastating impact on the country's 7.5 million children and women. A lot of children stay alone, losing their families. Humanitarian needs are multiplying by the hour as the fighting continues.

Also, the leading place is getting by the problems of Women, more than 70% families faced with the problem when the women become the sole earner in the family and at the same time the women need to combine the work with house responsibilities and care for a child. That's why the problem of job opportunities take the first place among the problem of refugee's women.

In this situation the EEN-Ukraine foundation wanted to be useful and proposes support programs for providing refugees and orphans with possibility to continue their normal life. Today we have three programs for supporting «women and children in needs» the link for the official website <http://eenukraine.com/charity-foundation/refugee/>
